## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 7-13, 18-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Yamazaki et al.

Yamazaki et al., discloses a rope tension measuring apparatus with features of the claimed invention including an elevator rope wear/tension measuring apparatus (see figures 1-27), with a sensor (element 38) and the corresponding detector (element 20) to determine the tension/wear of ropes (element 1a) based on a traveling wave induced in the rope. Figures 25a, and 25b illustrate two separate waves, which occur, and Figure 18 illustrates the wear/rope number. A history is also provided for the ropes and associated measurements. Figure 2AC states wear determination. Yamazaki et al., states that tension determines wear/break or untwisting can be determined.

3. Claims 2-6, 14-17 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
